Patent and Trademark Office			110		

Continuation of 2. NOTE: Applicant's amendment as presented raises the issue of indefiniteness under 35 U.S.C 112 second paragrap as well as not patently distinguishing the claims over the prior art of record. Specifically, it is unclear to the Examiner what is meant by the phrase "adhesive is applied to the batting to form as a unit the batting with the adhesive in place to provide an interface for an adhesive connection". It is the position of the Examiner that said phrase is grammatically awkward and does not clearly define the scope of the claimed invention. Additionally, a batting comprising adhesive regardless of the fiber limitations is not considered novel.
